APPENDIX A.

No.	Balance of work pending (as a result of expanded programme of settlements since 1920)
1	Preparing re-survey maps of 3,100 villages in 13 taluks. Two to two and a half years' work for the existing staff of 44 hands.
2	Lavani Phaisal Patraks (Settlement Registers) 7,200 villages in 27 taluks; and 3rd copies of Akarbands of 2,300 villages in 9 taluks. Two years' work for the existing staff.
3	Resettlement of 3 taluks; about 650 villages Time, 3 years.

No.	Items of work to be attended to hereafter (being in the nature of the Department's daily work)
1	Inam surveys and settlements. One-thousand six hundred inam villages to be dealt with. Five to six years' work for a staff of 80 hands.
2	Resurvey and inspection of Coffee Estates; detection of encroachments, unauthorised bagayets, etc. The work extends over 10 or 11 taluks. Estimate not possible; but the work will certainly be heavy and taxing.
3	Copying field books, translation of Mahratti entries, etc. Work necessary to maintain the results of many years' survey. Will take 6 to 7 years for a staff of 140 men solely employed thereon. Proposed to employ a smaller staff of 25 or 30 men, without disturbing the daily routine of other Land Record work.
4	Maintenance, durasti and other field work; restoration of Village Base Lines, detection of encroachments, sub-division of lands, etc. By doing this work methodically and thoroughly, we can avoid the need for any elaborate field work before the next revisions from 1934 onwards.
5	Collection and compilation of statistics for the next revisions in a systematic manner.
6	Revision of Potgi settlements, consequent on resettlement, as also the periodical revisions, biennial, quinquennial and decennial.
7	Professional help to land-holders, local bodies, etc., such as measurements, correct determination of erased or disputed boundary marks, sub-division and amalgamation of holdings, etc.
8	Hissa surveys when or if the Record of Rights is introduced; the revenue survey of village sites; frontier boundary disputes, etc.
	To cope with the above work, the standard staff proposed is one Measurer per taluk, or 2 in the case of heavier taluks; a supervising staff of 2 Nimtandars or testers (1 Surveyor and 1 Classer) per district; and one Gazetted Officer for 2 districts; the present system of District Surveyors and occasional Mojanidars under Revenue Officers to be abolished and all survey work of whatsoever nature to be attended to by the Land Record staff under Departmental supervision.
